GETTING STARTED

On behalf of Timbre Dynamics, I'd like to take this opportunity to welcome you as a customer. We are thrilled to have you join our close family of audio enthusiasts.

At Timbre Dynamics, we pride ourselves on offering responsive, competent and excellent customer service. Our customers are the most important part of our business. We take pride in building high-quality designs, audio components, and accessories. We stand behind everything we make as if it was our very own. We will do everything in our power to ensure your complete satisfaction, now and for as long as you are a customer. Here's how to get started.

1. Extract Your Assets

The first step is to decompress your asset download file and store the contents on a safe and secure drive. All assets are compressed using ZIP. Many operating systems already have the ability to decompress ZIP. If not, there should be plenty of applications available for your OS.

2. Read The Licensing Agreement

Remember, these assets are for your personal use only. You are responsible for ensuring the asset intellectual property stays contained. Please read the [Digital Assets Licensing Agreement.pdf](#) contained in the root of your extracted digital asset folder before proceeding.

3. Watch the Video (If available)

Your asset bundle may come with a quick start video title [Watch Me.mp4](#) which details the contents of the bundle and may contain helpful tips in how to use the files with our manufacturing partners.

4. Review the Parts List

Many of our bundles come with additional parts that must be purchased to complete your component. We also list links to our partners that will help you fabricate our components. Please read the [Parts List.pdf](#) for a complete list of materials and links to our partners.

4. Contact Information

If you have any questions about your purchase, please contact Timbre Dynamics by email @ support@timbredynamics.com or by visiting our website at <https://www.timbredynamics.com>.
